To Whom It May Concern:

I would like to take this opportunity to express on behalf of the Andalusia City School System our gratitude for the availability of funds through the E-rate program. We have used these funds to enhance and support our total educational program. E-rate funding has provided internet access for our students and teachers in a number of ways. E-rate funds help provide our T-1 lines for internet access. These funds have also provided parts for our network infrastructure, as well as, file server issues. We have also purchased computer hardware for student use through these funds.

In short, our system depends on these funds to maintain our current internet and network capabilities for our students and teachers. We would like to continue providing the opportunities for learning to our students provided by the E-rate funding program.

Sincerely,

Robert C. Harry
Technology Coordinator
