

Butler County Schools

The E-rate program allows Butler County Schools to provide our students with technology that would otherwise not be available. I think that a lot of people believe that E-rate allows schools to offer "bonus" technology and is not used to provide "basic" technology. In Butler County, our students would not have high-speed Internet access at all campuses if it were not for E-Rate. I consider high-speed Internet access to be one of the most basic forms of technology required in today's schools.

Thanks
