

## **Eufaula City Schools**

The E-rate program has been very helpful in getting our schools connected to the Internet. The Eufaula City School District is located in rural Barbour County and without the help of the E-rate program I do not think we could have all the Internet access that we currently have. The E-rate program has allowed us to connect all 5 schools to the Internet. The program has continued to allow students and teachers to have current information available to them by the Internet. I do not think it would be possible for us to continue to have the Internet access that we have if not for the E-rate program. This program also allows us to save money on all of our communications that would normally use local funds to pay for.
