

Greene County Schools

It was possible to update our entire network several years ago with funds awarded through the E-Rate program. Our students in rural west central Alabama are able to use technology that we could not afford without these funds. Telecommunication, internet access and our local area network is possible because of funds awarded through e-rate. We are now in need of upgrading our network. The opportunity to apply for e-rate funds is important to us; it makes the difference in preparing our students for the 21st century. Here in Greene County we appreciate the services made possible by funds from USAC.
