

Macon County Schools

Macon County Public Schools in Alabama is a rural public school system with over 90 percent of the population living in poverty. In today's educational environment, computers and internet access are vital to children's learning process. With E-Rate funding, our school district has a fast connection to the internet and a high speed data network capable of delivering distance learning and high bandwidth educational applications. Also, E-Rate helps pay for some of our networking equipment and telephone costs as well. Macon County is able to purchase more computers and educational software for students and teachers to assist with learning since E-Rate takes care of the bulk of our internet access and telephone costs.
