

# Morgan County Schools

In Morgan County we have phone service from three different BellSouth zones and two private telephone companies. This made it difficult to obtain high speed Internet for all of our schools. The funds we received from the E-rate program allowed us to use a wireless system for our Wide Area Network. Two years ago E-rate funds allowed Morgan County Schools to move from Wireless to a fiber Wide Area Network. It is my opinion, without E-rate funds, Morgan County Schools would be struggling to maintain an adequate network.
