

Muscle Shoals City Schools

E-Rate has created a better technological environment for the students of Muscle Shoals, AL. We receive around \$13,000 a year from e-rate funds. Although we are not eligible for internal connections, we do receive a 50% discount on all of our telecommunication needs. This provides phone services, wide area networking, emergency nurse communications, and Internet ability to the students of our school system. The reimbursements we receive allow us to use these funds in our much needed technology equipment and training that we normally would not have.
