

Pell City Schools

E-rate funding, combined with some local funds, has provided our middle school with a mobile computer lab. Due to limited space we could not set up another desktop computer lab for the school. The middle school was experiencing some growing pains in that they had teachers who wanted to use technology in the classroom but were unable to schedule time in the computer lab. The mobile lab will provide technology to over 600 7th and 8th grade students.
