

Thomasville City Schools

I just want our Senators and Representatives to know that without our E-Rate funds my school system would not have a T1 for Internet Access and cell phones for bus drivers which have proven to be vital for safety on and off campus. There is no way that we could pay full price for these without the assistance we get from E-Rate funds. My school system is in a rural area in southwest Alabama so we do not have as many options and opportunities as larger school systems. E-Rate has been great in helping us reach out through Internet to give our students access to visit a variety of people, places, and cultures and experience real life adventures.
