# Hands-on Workshops

**AETC 2004**

ASA engineers will teach the following two technical classes:

## **CREATING WEB PAGES WITH HTML TAGS AND JAVASCRIPT**

**Tiffany Davis**

Code#	09WA	Wednesday	8:30-11:30
	09WP	Wednesday	1:30-4:30
	09ThA	Thursday	8:30-11:30

This session is for Math, Programming, and Business/Marketing Education teachers who are interested in learning and teaching HTML tags and basic programming skills. Web resources and lesson plans will be provided. This class can be taught without purchasing software. Only a Web browser and a text editor are needed.

Grade Level: Intermediate (6-8), High School (9-12)

Audience: Classroom Teachers, Administrators

**INTERMEDIATE-level technology skills suggested.**

## **SECURING YOUR NETWORK: A HANDS-ON WORKSHOP**

**Donnie Moss and James Duncan**

Code#	33FA	Friday	8:30-11:30
	33FP	Friday	1:30-4:30

Participants in this class will learn about firewalls, switches, and routers through the creation of a network. Each participant will be responsible for the implementation of one aspect of the network.

Grade Level:

Audience: District or School Technology Coordinators

**INTERMEDIATE network administrator skills suggested.**

**Additional information and registration forms can be found at**

**[www.aetc.cc](http://www.aetc.cc)**

**If you are interested in attending one of these classes, YOU MUST PRE-REGISTER! You will need to pay the conference fee that includes admission to the Exhibit Hall, Concurrent Sessions, and a box lunch on Thursday between 11:30-1:00 AND an additional \$10 per workshop requested. To receive this rate, you must submit your registration and payment by May 12 or register online through May 24. After May 24, you can register On-Site and pay a conference fee of \$75.00.**
